

CO-OPERATIVES AND TRADE UNIONSIntroduction

This Bulletin deals with the following aspects of relations between Co-operatives and trade unions - particularly in Britain but also with comparative reference to other countries:-

- A general survey from the vantage point of the ILO (though without committing that body);
- Reports by two colleagues from national and local levels of experience in the British Movement;
- Two views by trade union leaders in Britain;
- Reports of experience in Austria and in Israel.

We are very much in the debt of our colleagues and contributors.
